ABOUT US

The **International Association of Insurance Receivers** (IAIR) was founded in 1991 to provide persons involved with insurance receiverships and financially stressed or troubled insurers a forum to exchange information, develop best practices, establish and maintain accreditation standards, and educate its members and others concerning the administration and restructuring of such insurers. IAIR's mission includes the establishment of a professional organization comprised of individuals who provide services associated with the affairs of insurers that are in receivership or otherwise financially troubled and in need of restructuring.

RESOLUTION WORKSHOP

The Insurance Resolution Workshop is the **International Association of Insurance Receivers'** premier event held in the spring each year. It is recognized for providing advanced, focused education for insurance receivers, regulators, guaranty system personnel, and other insurance professionals. The workshop includes an interactive program of speakers discussing the latest issues, and providing unique networking opportunities.

TECHNICAL DEVELOPMENT SERIES (TDS)

The Technical Development Series is the **International Association of Insurance Receivers'** specialized educational program held in the fall each year. Focusing on a primary issue, it provides advanced, focused education on the selected issue or topic and affords more specialized training for insurance receivers, regulators, guaranty system personnel, and other insurance professionals.
